

THE PLANT TISSUE PLUS APP

Agronomic practices improve yearly with more technology and breakthroughs. But what about making agronomy easier? Is there an app for that? Now there is. The industry asked for easy, and Rock River Laboratory responded with The Plant Tissue Plus app. This free plant tissue sample submission app was created to make life easier, and if you have a smart phone or tablet, you're already set with what you need to submit samples and can begin to experience:

- + Time Savings**
Save time in the field and on your sample submission. Submit a sample with as little as six screen taps and no typing or writing.
- + Error Reduction**
Pre-loaded selections reduce typing and time to find information - ultimately lessening the chance of human error in sample submission for improved results accuracy.
- + Sample Tracking Improvement**
Consistent, saved naming of farms and fields makes it easier to find and track data from sampling event to sampling event

Realize these benefits and more thanks to the simplicity of the Plant Tissue Plus app, featuring:

Customization

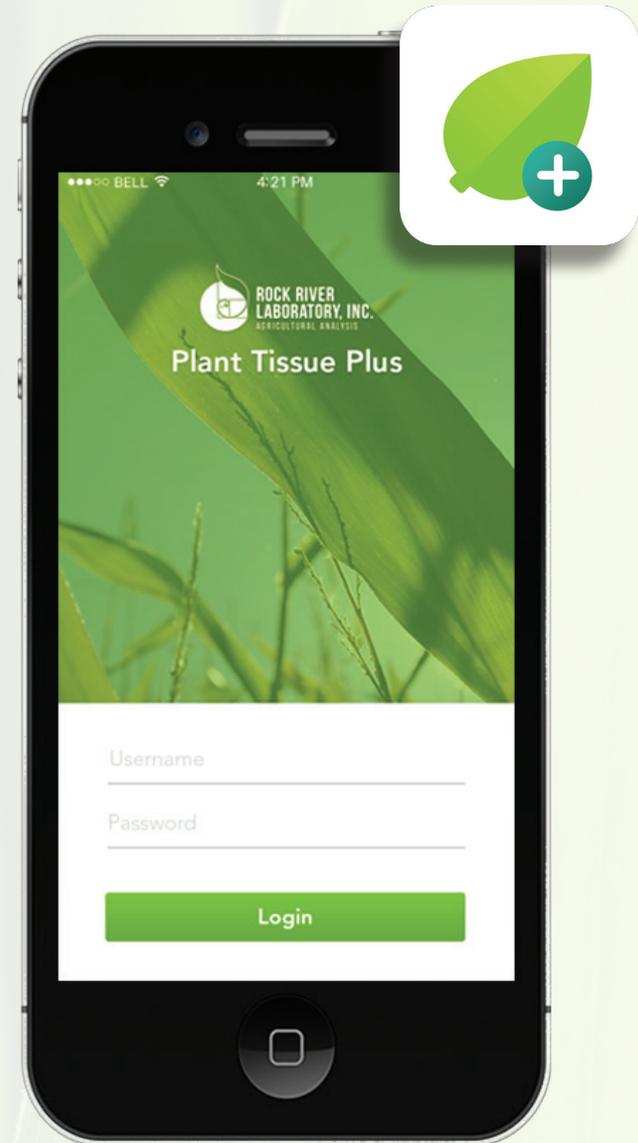

The simple web-based setup puts you in the driver's seat of the information that saves to the application.

Details Capture

The Plant Tissue Plus app utilizes your device's camera, allowing you to capture photos to include with analysis results-making grower discussions easier.

Ease of use

To maximize field staff's efficiency, the Plant Tissue Plus app's streamlined interface is fast and intuitive.

Download the Plant Tissue Plus app from the App Store or Google Play today and start reaping the benefits of sample submission made easy.

Find helpful app demonstrations, tips, and tricks on the Rock River Laboratory website.
