

PLANT TISSUE PLUS APP: TRAINING OPPORTUNITIES

The Plant Tissue Plus app was built to make agronomist's lives easier by saving your team time and frustration. But none of these benefits come to fruition until you utilize the app. Rock River Laboratory provides multiple options to train one to one hundred of your team members to be skilled users of the app so you can focus on more important things.

Choose one or combine training options to fit your team's needs:

+ Customized recorded webinar
If your team has a hard time synching schedules, a recorded webinar can help. Simply provide Rock River Laboratory with customization specifics and we'll create a fully recorded walk through of the Plant Tissue Plus app setup, and use, and additional tips, customized with your team's information so they can walk through the app when it fits their schedule.

+ Live webinar
For those teams spread out across large territories, virtual live connection through a webinar allows for interactive training despite these location challenges. Arrange a date, time, and customization specifics and we'll prepare for an interactive virtual training that will mold your team into a Plant Tissue Plus app guru.

+ In-person demonstration
Already hosting a monthly meeting that brings your team together? Let Rock River Laboratory know the date and time and we're happy to make Plant Tissue Plus app training part of the agenda. All we need is an hour of your team's attention and smart phones handy.

Even after training, Rock River Laboratory's customer service team is poised and ready to answer questions, solve challenges and troubleshoot areas on the Plant Tissue Plus app to keep your team efficient in Plant Tissue season.

Call or e-mail Rock River Laboratory today to schedule a Plant Tissue Plus app training!
