- Plastic bottles must be used. A water-testing kit that includes a plastic bottle and a pre-paid shipping label is available upon request if not included in your kit.
- Always use a clean bottle.
- Fill the bottle to fill line with water (from tank, line, or well).
- Properly label the sample, preferably with permanent ink. Make sure the container is tightly closed and does not leak.
- Refrigerate the sample if you are not immediately shipping or delivering it to the lab.
- Submit the sample to Rock River Laboratory within 48 hours of sample collection.
- Call Rock River Laboratory at 920-261-0446 with any questions.
