EASY PLOT PROGRAM

STREAMLINE YOUR PLOT STUDY

ROCK RIVER LABORATORY, INC.
AGRICULTURAL ANALYSIS

Acquiring and organizing seed plot analytical data is overwhelming, cumbersome, and time consuming. The Easy Plot program simpliflies, streamlines, and automates the process of sending and analyzing forage samples via Rock River Laboratory. Easy Plot users can reap the benefits of:

Customized Assistance
Easy Plot participants can choose shipping assistance details and handling responsilibites to fit their time and budget.

Simple Setup
After signup, users share plot locations in a single master spreadsheet (provided by Rock River Laboratory). This also contains all information to be included on plots' sample results. Rock River Laboratory organizes sample needs prior to harvest - creating customized tools for internal and external sample tracking.

Streamlined Submission
Every piece of submission, including QR code labels, sample bags, return shipment labels, and analysis request forms, is provided by Rock River Laboratory. The appropriate submission kits can be disseminated to all field reps - helping circumvent potential logistical and communication challenges.

Responsive Data Handling
Users can privately view and download the available data. Customizable spreadsheets provide formatting freedom - allowing participants to pull the nutrient information that is most important to them and offering the flexibility of data organization - by relevance or priority - to assist in hybrid ranking efforts.

Privacy and Security
Customer information and data integrity is of the utmost importance. Users can rest assured that their valuable plot analysis data belongs to them and will not be shared or compromised.

Ready to make plot life easy? Download the Easy Plot Logistics and Information Agreement from our website, or contact us to learn more.
