ANALYSIS OPTIONS

#1: COMPREHENSIVE MANURE ANALYSIS BY NIR
Starch, Fat, Total Tract Starch, & Fat Digestibility

#2: COMPREHENSIVE MANURE ANALYSIS BY WET CHEMISTRY
Starch, Fat, Total Tract Starch, & Fat Digestibility

#3: FECAL STARCH & TOTAL TRACT STARCH DIGEST BY WET CHEMISTRY

SAMPLE ID	DATE SAMPLED	MANURE SOURCE (Dairy, Beef, or Calf)	TEST #1	TEST #2	TEST #3

MANURE SAMPLING TIPS:

- For Dairy or Beef cattle, sample from pens with greatest dry matter intakes.
- For calves, sample with farm-approved fecal sampling protocols.
- Collect at least 10 fecal samples into a pail, thoroughly mix and subsample into the laboratory-provided plastic container.
 - Fill sample container no more than 2/3 full.
- Seal the plastic container with duct tape and ship promptly to the laboratory.
- If sample will not be shipped immediately, freeze the sample and ship at a later date.
- Sample should be delivered to the laboratory within 48 hours of sampling to avoid substantial changes in starch and fat content.
- Contact the laboratory for on-farm research projects and additional support.

ANY MANURE RECEIVED IN ANY CONTAINER OTHER THAN A ROCK RIVER LABORATORY-ISSUED JAR WILL AUTOMATICALLY RECEIVE A \$10 SURCHARGE. AS SUCH, WE ARE READY TO PROVIDE YOU WITH AS MANY FREE MANURE SAMPLE JARS AS YOU NEED.
