

VISUAL REPORTS

THE NEXT GENERATION IN NUTRITION ANALYSIS REPORTING

Values can mean different things to different people. Rock River Laboratory now offers a method to level this playing field. Visual Reports create a graphic means to communicate exactly what the values on a Rock River Laboratory nutrition analysis report represent – good, bad, or needing improvement. Easily update your reporting format to include these visual representations of analysis values, in addition to numerical values, and unlock new ways to approach:

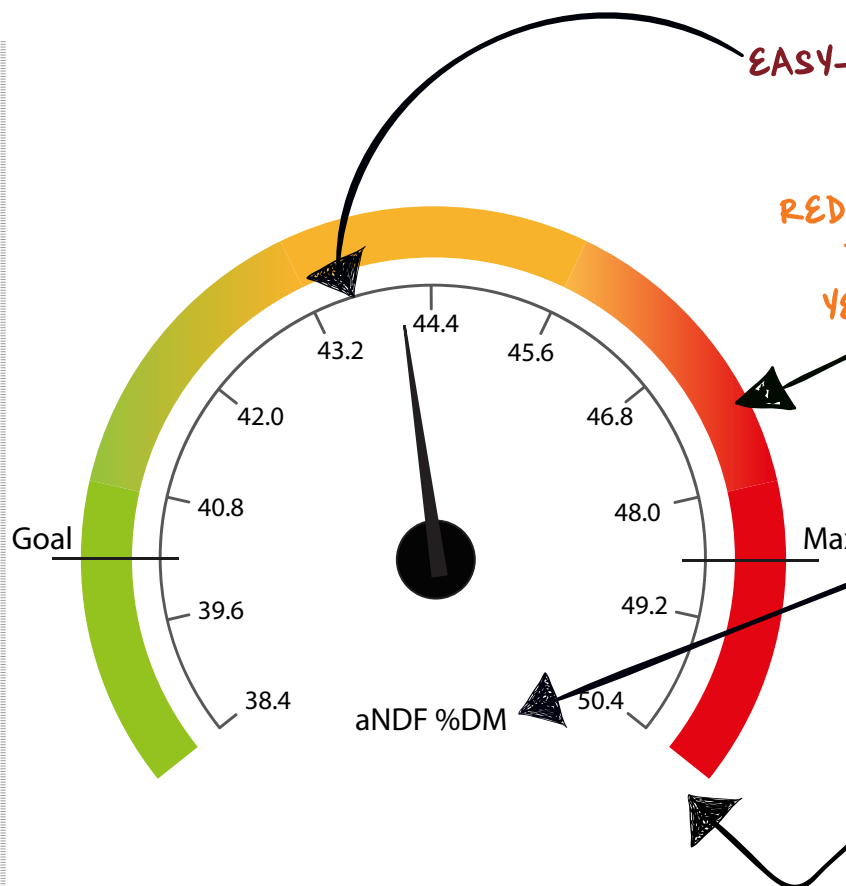

Improving communication between nutritionists and producers, veterinarians and other consultants.

Training new nutrition team members on optimal nutritive levels and feedstuff assessment.

Exemplifying the recommendation of specific forage quality opportunities.

Relaying the impact of ration changes to producers in an easy-to-understand format.

Quickly assessing the nutritive value of feedstuffs for on-farm decision making.

EASY-TO-UNDERSTAND DASHBOARD STYLE FORMAT

RED, GREEN, AND YELLOW COLORS DEFINE GOALS BASED ON FOUR YEAR AVERAGES AND STANDARD DEVIATIONS

ALL ROUTINE NUTRITIVE AND DIGESTIVE MEASURES AVAILABLE IN VISUAL REPRESENTATION

CONVENIENTLY CREATED AND CUSTOMIZED ONCE LOGGED ONTO THE ROCK RIVER LABORATORY WEBSITE

SIX ANALYTE DIALS PER REPORT
