

VISUALIZER

**ROCK RIVER
LABORATORY, INC.**
AGRICULTURAL ANALYSIS

DON'T JUST VIEW YOUR DATA, VISUALIZE IT

Data is only as powerful as the ability to organize and understand it. Harvest the most benefit of Rock River Laboratory's accumulated soil, plant, and manure analysis data with the help of Visualizer. This library of applications created by Rock River Laboratory shares clean data in simple dashboards and calculators that can be used to:

- Estimate the economic value of manure
- Calculate your exact nutrient removal
- Visualize and plan your fertilizer strategy

The Agronomic Manure Value Calculator

uses animal type, manure type, and constituent percentages to provide a total economic value for marketing valuable manure.

The Agronomic Manure Dashboard

outlines mineral constituent distributions based on animal type and dry matter ranges.

The Nutrient Removal Calculator

forecasts the amount of nitrogen and other key nutrients that will be removed from the soil based on crop, region, harvested tons, moisture, and test weight.

Find these Visualizer apps and others by logging into the customer portal at rockriverlab.com and clicking 'Visualizer Apps'. Plus, check out Visualizer demonstrations by visiting the Rock River Laboratory YouTube channel.
